Brainstorm & Idea Prioritization Template:

Team Gathering, Collaboration and Select the Problem Statement and Brainstorm, Idea Listing and Grouping and Idea Prioritization:

1

Define your problem statement

This application is intended to provide the online job recommender system and people can apply jobs in online, apply for multiple companies at same time. Having lots of skills but wondering which job will best suit you? Don't need to worry! We have come up with a skill recommender solution through which the fresher or the skilled person can log in and find the jobs by using the search option or they can directly interact with the chatbot and get their dream job.

2

Brainstorm

Write down any ideas that come to mind that address your problem statement.

Prabhu P

We can use chatbot to interact with users.

We need location data to recommend jobs in their location.

Vasanthan P

We have to send a detailed job recommendation to the users. Because the user have to know the details.

Users can get a push notification for all job recommendation.

Sneethamala P

We have to send a notification to the user about their job recommendations.

The notifications about the jobs should be detailed.

Sushvin M

Users can interact with the company HR or HR team for their interview and other information about company.

We have to provide a customer care via chatbot and phone calls to guide the users to get their job.

Sneethamala P

We can use cloud for more security.

Need to get the users skill & role details to recommend a jobs.

Users have to update their details frequently for their jobs.

We have to send a mail about their jobs application status like job application accepted or rejected for that role etc.

We can use the chatbot from cloud and we can get more security and users details also be secured.

Tip: You can select a sticky note and in the panel below to select sticky to start drawing
